

EXHIBIT C

GE
Plastics

Executive Summary:

GE Plastics is a leading global manufacturer and distributor of plastics resins and plastics shapes used in a number of key industries including automotive, computers, telecommunications, appliances, optical media, packaging, and building and construction. GE Plastics manufactures and compounds polycarbonate, ABS, SAN, ASA, PPE, PC/ABS, PBT and PEI resins.

GE Plastics is among the largest producers of high-performance polymers used by electronics, office equipment, computer, and automotive manufacturers. The division includes the operations of GE Polymerland, an online resin distributor; Specialty Film & Sheet, which makes the polycarbonate sheet and film called Lexan; GE Polymershapes, a plastic film, sheet, and tube distributor; and GE Resins, a producer of all manner of plastic resins. It also owns LNP Engineering Plastics, a plastics compounding firm. In 2007 GE sold the unit to Saudi Arabia's largest public company, SABIC, for \$11 billion.

GE Plastics Global headquarters is located in Pittsfield, Massachusetts, USA. Since 1969, the company's European headquarters have been located in Bergen op Zoom, the Netherlands. Employing more than 3,000 people across Europe, GE Plastics now has sales and service offices across Western Europe, Eastern Europe, Scandinavia and Russia. The GEP Pacific Headquarters are in Shanghai, China. The company was founded in 1930 and has 2006 revenues of \$6.645B. GEP employs approximately 11,000 employees in over 60 worldwide locations.

Products:

Lexan Resin:

Polycarbonate (PC) used in automotive headlamps, medical devices, mobile phones, laptops and DVD's.

Noryl Resin:

Modified polyphenylene ether and high impact polystyrene used in Eco-friendly wire coating, electronic components, and fluid handling instruments.

Ultem Resin:

Polyetherimide (PEI) used for extreme high heat and chemical resistance in firefighter helmets, circuit boards, and the aerospace industry.

Valox Resin:

Polybutylene Terephthalate (PBT) used for Eco-friendly manufacturing (recycled water bottles), automotive under the hood parts.

Xenoy Resin:

PBT and PC- Chemical and impact resistance for Eco-friendly manufacturing (recycled water bottles), transportation body panels and bumpers.

Cycolac/Geloy Resins:

Acrylonitrile Butadiene Styrene/Acrylic Styrene Acrylonitrile (ABS/ASA) used for the automotive, toys, building and construction industries.

Cycoloy Resin:

PC and ABS- Automotive instrument panels, computer monitor enclosures, mobile phones.

Industry Application:

Automotive

GE's high-performance thermoplastics have facilitated the evolution of the modern automobile. Compared to traditional metals, our engineered materials have contributed to enhanced silhouettes, aesthetics, security, and manufacturability, as well as better performance on the road, in the driver's seat, and at the pump. The depth and breadth of GE's resources create benefits for nearly everyone in the automotive industry: designers, suppliers, OEMs, and, ultimately, consumers.

Bath and Spa

Our Geloy* resins can offer unique color and aesthetic solutions to bath and spa liners all while virtually eliminating clouding, fading, or cracking, and offering UV and chemical resistance under these tough conditions. Also, unlike traditional ASA resin solutions, Geloy resin can maintain its beauty and strength up to three to five times longer, and allows for easier repair of the spa and hot tub shells if they are damaged. For pumps and other components, GE's Xylex* resins present a high-performance solution.

Building and Construction

GE Plastics offers a broad portfolio of sheet and film products for building and construction. Many, like our Lexan* polycarbonate structural sheet, are designed for rapid construction. And performance - as with the virtually unbreakable Lexan* sheet - has often been the reason architects and builders choose our products.

Electronics

Our broad portfolio of high-performance materials and our expertise have contributed to the development of many current portable electronic device designs, and we continue to create solutions for critical functionality in this segment - from thermal management to shielding. Combining excellent mechanical properties and versatile colorability, GE's thermoplastic technology can help make products more durable and reliant, lighter, and visually unique.

Healthcare

In addition to application development specialists and customer support teams, GE maintains a dedicated Healthcare team to track global advances and emerging industry trends. This team creates solutions that help you meet today's challenges and prepare for the applications and regulatory needs of tomorrow. We offer materials solutions for areas ranging from sterilization trays and advanced housings materials, to endoscopic surgical instruments and blood filters -- and nearly everything in between. Health professionals, patients, and lab workers alike may benefit from the materials and knowledge that GE - Plastics offers.

Packaging

Packaging can benefit from our high-performance polymers, including Noryl*, Lexan*, Cycloloy*, and Ultem* resins, and LNP* specialty compounds. Each is unique, offering its own exceptional properties. From conductivity to extreme heat resistance, GE's materials offer solutions right for you. If keeping computer chips safe and serving foods in take out containers seem unrelated, they are -- and that is why GE-Plastics offers such a wide variety of solutions

Security

GE Plastics offers a broad portfolio of sheet and film products for building and construction. Many, like our Lexan* polycarbonate structural sheet, are designed for rapid construction. And performance -- as with the virtually unbreakable Lexan* sheet -- has often been the reason architects and builders choose our products.

Sign and Display

Offering design freedom, ease of production, and long life, GE Plastics products for graphic production include Lexan* and Lexan Margard* polycarbonates. Extra-weather and heat-resistant grades are available, as are surfaces designed to withstand abrasion and breakage.

Storm Protection

Today, GE Plastics offers a broad portfolio of sheet and glazing products that are widely used in the building and construction markets. GE's virtually unbreakable and beautifully clear Lexan sheet features light weight, high stiffness, impact and fire resistance and weatherability. This high-technology sheet product with highly specialized properties is an excellent candidate to help home owners and builders protect their families and property during storms.

Textiles

Fibers made from GE's Ultem*, Valox*, Noryl*, and Lexan* resins, in combination with other fibers, can help address a variety of needs and concerns in everything from flame retardant mattresses and airplane seats, to industrial filters and military apparel. In woven, non-woven, and loose-fill applications, the addition of our materials might be just the solution you are looking for to meet requirements without sacrificing performance, comfort, or aesthetics.

Transportation and Outdoor Vehicles

When it comes to goals like lower weight and VOC emissions, increased design flexibility and aesthetics, GE - Plastics may offer an excellent material solution. Our goal is to help customers solve their tough challenges throughout the industry with our advanced material solutions. GE is constantly striving to research and design materials to meet the challenges of today and the future.

**General Electric Plastics
Automobile Liability
August 1, 2007 to August 1, 2008**

NAMED INSURED AND ADDRESS (TBD):

General Electric Plastics
1 Plastics Avenue
Pittsfield, MA 01201

POLICY PERIOD:

Policy Effective: 8/1/07

Policy Expiration: 8/1/08

COVERAGES/LIMITS:

	Limit	Symbol
Combined Single Limit	3,000,000	(1)
Personal Injury Protection (No Fault)	Min. Required by Law	(5)
Auto Medical Payments	\$10,000 Per Person	(3)
Uninsured/Underinsured Motorists CSL	Min. Required by Law	(6)

Covered Auto Symbols:

- (1) Any Auto
- (3) Owned Private Passenger Autos Only
- (5) All Owned Autos which require No-Fault Coverage
- (6) All Owned Autos Subject to a Compulsory Uninsured Motorists Law

Deductible: \$250,000

Allocated Loss Adjustment Expense erodes the deductible.

Allocated Loss Adjustment Expenses in addition to limits.

COVERAGE EXTENSIONS

1. Blanket Coverage for all owned, leased, nonowned and hired; Covered Auto Symbol "1"
